

Player Info

Get player info from operator system.

Endpoint

POST /seamless/player/info

Request Fields

Name	Type	Mandatory	Description
session_id	String	Yes	Active game session identifier. Equals the launch <code>session_id</code> : the operator-provided value, or the one generated by the platform when the launch omitted it or sent it blank.
user_id	String	Yes	Player identifier in the Operator system.

Response Fields

Name	Type	Mandatory	Description
result_code	int	Yes	Result code. 0 indicates success.
user_name	String	Yes	Unique, stable player username in the Operator system. Used as the primary player identifier by the Integration Service and game

			servers. Must not change for a given player.
country	String	No	Player's country code in ISO 3166-1 alpha-2 format (e.g. <code>GE</code> , <code>US</code>), if available.
date_of_birth	String	No	Player's date of birth in ISO 8601 format (<code>YYYY-MM-DD</code>), if available.

Example

Request:

```
POST /seamless/player/info
{
  "user_id": "1234",
  "session_id": "f47ac10b-58cc-4372-a567-0e02b2c3d479"
}
```

Response:

```
{
  "result_code": 0,
  "user_name": "Test1",
  "country": "GE",
  "date_of_birth": "1999-01-01"
}
```
